

GENEROSITY HEALS

"Embrace life," is the motto that Claire lives by. It is a profound statement coming from a young woman. She is not only a patient of Florida Hospital, but she was one of the first children to be treated at Florida Hospital Cancer Institute when it opened its doors in 1997.

"Because of my doctors at Florida Hospital, I'm a survivor!" exclaims Claire.

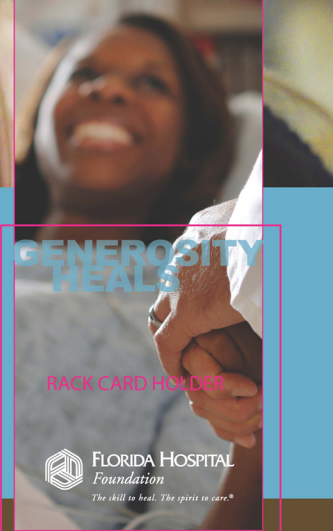

Today, she lives her life to the fullest and has a wonderful outlook. She is currently going to school to study nursing. Her dream is to one day encourage and care for children who are fighting the same battle that she did many years ago.
